Laminate Counter Top Template Fee and Conditions

Template Service: \$120.00 per visit

Terms and Condition:

- Homeowners or Job-site address and contact information must be furnished to Knapp Supply prior to setting a time for measure and/or templates.
- For an existing home, a person 18 years or older, must be present for us to begin the template and/or measure.
- For a new construction site the unit must be unlocked or we must be provided a key to enter the site.
- All base cabinets must be installed and secured. Where the top meets any type of tall panel, oven or pantry cabinet it will be measured flush to the cabinet style and an end splash will be required. If top is to be notched in the field it must be noted to the person measuring and templating for addition of extra length.
- All overhang dimensions must be noted and given to us at time of measure and template.
- Any tops with an angle will require a template.
- If a template is to be made on an existing home the old counter tops must be removed.
- It is Knapp Supply's discretion to determine if a template is needed.
- A field measure and / or template do not guarantee that NO job site adjustment will need to be made. In most cases scribing to the top must be made by the installer to ensure a good fit, and even then there may be gaps that require caulking. This is most commonly caused by out of square walls, dips and humps in the drywall or cabinets being set out of square.
